SafeCare Hospital Ratings

Comparing Cost, Quality, and Safety of Hospitals

LEXINGTON, KENTUCKY, USA, March 2, 2025/SafeCareGroup.com/-- The SafeCare Group, the company that connects people with great hospitals has released its First Quarter 2025 hospital Star Ratings on its www.100safecarehospitals.com site.

Hospital ratings have become an essential tool for patients, healthcare providers, and policymakers. These ratings, often based on a combination of clinical outcomes, patient satisfaction, and safety metrics, serve as a benchmark for evaluating the quality of care provided by hospitals. As healthcare systems grow increasingly complex, the importance of transparent and reliable hospital ratings cannot be overstated. They not only empower patients to make informed decisions but also drive hospitals to improve their services and maintain high standards of care.

“There is no shortage of hospital awards and recognitions in the USA healthcare industrial complex, stated Yisrael M. Safeek, MD, MBA, The SafeCare Group Chairman and CEO. “Hospital executives are constantly on the lookout for any and every competitive edge in a dog-eat-dog market environment. As a result, some paid hospital rating services have taken advantage of the situation and tailored their pitch to these languishing executives.”

For patients, hospital ratings are a valuable resource when choosing where to seek treatment. Whether selecting a hospital for a routine procedure or a life-saving surgery, patients can use ratings to compare institutions and make decisions that align with their healthcare needs. Since 2013, The SafeCare Group’s hospital rating site www.100safecarehospitals.com has been displaying quarterly hospital ratings in 47 metrics as shown below:

Since 2013, www.100SafeCareHospitals has published quarterly hospital ratings. The platform analyzes hospitals' performance with time-tested, and evidence-based metrics of:

§ Hospital Charges - 5 measures;

§ Wait Times - 8 measures;

§ Medical Errors - 13 measures;

§ Unexpected Readmissions - 14 measures;

§ Hospital Infections - 7 measures.

Some of the most critical components of hospital ratings is the measurement of clinical outcomes such as hospital acquired infections, and unexpected hospital readmissions, patient safety such as medical errors, and efficiency such as patient wait times.

Dr. Safeek continued, “Each year, hospitals shell out thousands of dollars (sometimes hundreds of thousands) for ratings that in some cases are inflated and in other instances, outright deceitful. Several cases come to mind in my previous roles as a hospital executive.”

Recognizing Healthcare Excellence® is our trademark.
We analyze data and publish ratings and rankings on about 5,000 accredited hospitals, including over 130 Veterans Affairs hospitals and over 50 military hospitals.

About The SafeCare Group®

Since 2016, The SafeCare Group invested heavily into Artificial Intelligence (AI) platforms known as Intelligent Healthcare™ PaaS by leveraging machine learning and deep-learning capabilities. SafeCare AI® Suite fosters a new generation of AI applications, which are able to sense, reason, act and adapt, to address a range of healthcare challenges in such areas as readmissions, medical errors, infections, cost, and outpatient utilization.

Since 2014, SafeCareSoft® SaaS solutions enable hospitals to take advantage of disruptive healthcare software known as Softwaring Healthcare Excellence® that optimize hospital ratings and regulatory accreditation.

In 2013, <https://www.100safecarehospitals.com/> rankings were created to help consumers choose a better hospital.

In 2019, The SafeCare Group launched <https://rateahospital.com/> to allow patients to share care experiences.

The SafeCare Group® was founded in 2010. For more information visit www.safecaregroup.com
