## Outdated Hospital Accreditation Methods

### *Contributes to Mediocre Hospital Outcomes*

LEXINGTON, KENTUCKY, USA, July 7, 2022/SafeCareGroup.com/-- The SafeCare Group, the company that connects people with great hospitals updated its *Mediocre Hospital Outcomes Report: Analyzing the Puzzle of Poor U.S. Hospital Care with Recommendations*. The report now includes a major contributor to mediocre hospital outcomes - outdated hospital accreditation methods.

**“Current hospital accreditation methods do not seem to be providing better care, treatments, or services as promised.**

**The SafeCare Group recommends that CMS deemed status accreditation be based on objective EMR data that measures evidence-based, time-tested outcomes of care.”**

**Yisrael M. Safeek, MD, MBA  
CEO,  
The SafeCare Group**

“Current hospital accreditation methods do not seem to be providing better care, treatments, or services as promised,” stated Yisrael M. Safeek, MD, MBA, CEO, The SafeCare Group. “The Centers of Medicare and Medicaid has to reexamine its deemed status accreditation program as it does not seem to promote what’s actually important: the health, safety, and optimal experience of patients.”

“The SafeCare Group recommends that CMS deemed status accreditation be based on objective data that measures evidence-based, time-tested outcomes of care. There is enough EMR-based data that can be utilized to improve hospital care, treatment, and services.”

“Further, empowering patients, caregivers, and providers with reliable healthcare information should be a priority. There is no place in healthcare for secret accreditation reports anymore. Current reports are secret because the conclusions are based upon the wholly subjective “tracer methodology” employed.”

The SafeCare Group recommends that accreditation reports be public.
