Faking Semitic

Ashkenazi Jews Are Not Semitic Descendants of Israelites

LEXINGTON, KENTUCKY, USA, July 9, 2025/SafeCareGroup.com/-- It is now more than 77 years since the mass displacement and dispossession of nearly 700,000 Palestinians from their homes in the Holy Land by European colonizers.

The 1948 European occupation of Palestine represents an evil scheme to eradicate the descendants of the Israelites through theft of semitic identity, property, and possessions.

The origin of the Ashkenazi Jews, who come most recently from Europe, has largely been shrouded in mystery. But a new study suggests that at least their maternal lineage may derive largely from Europe.

DNA studies show that Ashkenazi Jews are not Semitic; are actually converts from local European populations.

“DNA contradicts the notion that European Jews descend from people who left Israel and the Middle East around 2,000 years ago.

The genetics suggest the founding Ashkenazi were actually converts from local European populations.”

The cover story *Faking Semitic: Ashkenazi Jews Are Not Semitic Descendants Of Israelites* is a detailed article on:
